

Case Title	MAN Dual-Fuel MGE 40.000 RHR Overhaul
Machinery Type	1 (x) MAN 9L51/60DF
Achievement Date(s)	March 2022

Project Details

Our Dual-Fuel Expertise in combination with our engineers' diverse experience was the perfect duo for the very successful completion of the 40.000 RHR Overhaul for this MAN 9L51/60DF during its voyage and therefore allowing the continuity of its chartered trading commitments without any down-time despite the difficult scope. The scope included, but was not limited to tasks such as the below:

- Cylinder Head overhaul on board via Chris Marine
- Cylinder Liner honing on board
- Bearing renewals
- Peripheral pumps and valves overhaul on board
- Connecting rod renewal

And More

As always, the attendance yielded perfect results with a 5/5 score from our client which is a testament to our engineers' capabilities. Of course, measurements, reporting and suggestions for improvements were submitted upon completion of the run-in test of the MGE.
