

Case Title	Open-Up Inspection Analysis for a Wartsila MGE
Machinery Type	Wartsila 8L34DF
Achievement Date(s)	May 2022

## **Project Details**

In line with our service agreement, our team boarded our client's LNG Carriers equipped with a total of Four Wartsila L34DF MGEs in order to carry out an IDM Inspection as well as a Cylinder Head Replacement as it was pressure leaking. Among others, the following service was conducted in this successful attendance.

- Cylinder Head Renewal (swing set)
- Piston Cleaning and Ring Renewal
- Visual Inspection of Connecting Rod and Bearing
- Crankshaft Deflection measurements
- Endoscopic inspection of Cylinder Heads, Liners and more components.
