

3x Wartsila 50DF, Voyage Overhaul – Common Practice.

Our attentiveness and in-depth experience has enabled us to take on what can be described as otherwise “complex” tasks, on a routine basis. Boarding a vessel and conducting a 3-engine overhaul is a normal task for KAIMS and our people.

During this “routine” attendance, we boarded our client’s LNG Carrier to complete a TOP Overhaul on a Wartsila 12V50DF, a Major Overhauling on another Wartsila 12V50DF, yet we also renewed the Turbocharger Cartridges (Napier NA357) for its Wartsila 6L50DF.

Among the multiple tasks conducted, was the Cylinder Liner Honing, Big/Small – End Bearing Bush Renewal, Main Bearing Renewal, multiple adjacent parts overhaul and more.
