

4x MAN 51/60DF Overhauling Project Knowledge is Experience.

Despite the Wartsila 50DF Engines being our “bread & butter”, experience comes in all forms. For this project, we were invited to perform a 26.000RHR Overhauling project on an LNG Carrier’s all four engines (MAN 8/9L 51/60DF).

On this 3-month attendance, we performed on board Cylinder Head Overhauling via Chris Marine. Yielding great results, we conducted Piston Overhaul, Cylinder Liner Honing, Adjacent Parts and Pumps refurbishment and more.
