

4x Wartsila 12V50DF and 1x Wartsila 6L50DF – A Meeting in El Ferrol, Spain.

In August of 2023, we were invited by one of the leading companies to attend the (simultaneous) overhauling of two Wartsila 12V50DF Engines for their 72.000RHR Overhauling Interval, +Alignment +T/C Cartridge Renewal.

Works such as cylinder head renewal, cylinder liner honing, Main Bearing & Big/Small – End Bearing renewal, camshaft bush renewal and many more... would have to be completed within a period of less than 32 days.

We successfully completed the above during the vessel's DD, while in the same shipyard, another vessel was been attended by KAIMS for a 3-engine project.

4x Wartsila 12V50DF and 1x Wartsila 6L50DF – A Meeting in El Ferrol, Spain.

Whilst one team was busy on the 72.000RHR Overhaul on two Wartsila 12V50DF Engines, another group was handling the 36.000RHR Overhauling on a set of Wartsila 12V50DF and one 6L50DF Engine.

Multiple works as usual were completed, such as Cylinder Head Renewal, Cylinder Liner Honing, Adjacent Pumps and Parts renewal & refurbishment and more.

This was a testament to our work force, and our commitment of our continuous support to our clients no matter the circumstances.
